

Summer School Digital and Competition 2024

July-August, online or on-site, Digital Competition

Day 1

10 am - 12 am

Introduction to digital and AI markets

Digital and AI markets are fast-moving and complex. This introduction provides an overview of their operations and the latest market developments.

Day 2

10 am - 12 am

Antitrust and artificial intelligence

AI is a top priority for competition authorities worldwide. This course explains the key competition concerns and highlights the main findings from recent market studies.

Day 1

2 pm - 4 pm

Digital competition regimes

Germany, Europe, and the UK each have distinct digital competition regimes. This course covers the latest regulatory developments and explores how these regimes interact.

Day 2

2 pm - 4 pm

Digital regulation cooperation

Digital and AI markets intersect with multiple regulatory regimes, including competition, consumer protection, and data protection. This course offers an overview of these interplays.

Why

We add value by training your staff with the latest market and policy developments needed to solve your challenges on data, AI, and competition

Whom

We offer courses to legal, economic, investor, and policy professionals from private (eg., digital firms, law firms) and public institutions (eg, authorities, courts)

Where

We offer training sessions online or on-site

Price

800€ per individual (minimum 5 people, excluding travel expenses)
